

Safely Kill Mold, Mildew, Eliminate Nasty Boat Odors - Provide Ongoing Protection Against Mold and Mildew

- EPA Registered
- No VOC's
- Phosphate Free
- Non-Chlorinating
- No Negative Impact on the environment
- Not harmful to humans, animals or plants
- Kills malodors and their source
- Safe for food surfaces

The **Disinfection Technologies Group** utilizes cutting-edge spray technology to apply our EPA Registered, safe Hospital disinfectant to all porous and non-porous surfaces to safely and effectively kill 99.999% of harmful bacteria, virus, and fungi including all three stages of MOLD (Vegetative, Fruiting & Spore)

- General Yacht Disinfection
- ODOR Removal
- Kills Mold, Mildew and other pathogens including those in Air system and ducts
- Safe and effective for water systems
- Eliminates Holding Tank ODORS

Problem:

Odor caused by Mold, mildew, bacteria and other harmful pathogens are prevalent on boats due to moisture, fluctuation in temperature and insulation issues. Odors from head, bilge and water systems can permeate porous surfaces and air systems making an enjoyable pastime not so enjoyable!

Solution:

The **Disinfection Technologies Group** can effectively eliminate the odor while killing the responsible source utilizing our unique Bio-InvisaCoat™ process. We can also provide an antimicrobial barrier that will inhibit the growth of mold, mildew, fungi, algae and bacteria.
